I think the Alvo went down inside the stream, off the Carolina coast. If the steamer went down outside the lifeboat would have floated out into midocean.

"This lifeboat had been drawn down twenty or thirty fathoms below the surface, probably was drawn down by the suction caused by the sinking of the Alvo. There are evidences on the boat of water pressure. When the boat came up the people then got in it. These people were probably clinging to some wreckage, and abandoned it for the boat."
